**Measurable
Management®**

Objective

The objective of the Measurable Management® Program is to create a team of leaders who will effectively apply leadership and team building skills to the process improvement goals and objectives of the company.

Participants

Measurable management is designed for front line managers and supervisors who are engaged in any type of continuous improvement initiative.

Duration

The program is delivered in small segments over a 14 week period of time. As a project, the students will identify and implement at least three improvement ideas over the course of the program. The total class room and project time is approximately 60 hours over the 14 week period.

Pre-requisites

There are no pre-requisites for this course.

Fee

The fee for the course is \$2800 per student.

Course Content

Measurable Management® equips front line leaders with skills and tools to engage their employees in continuous improvement activity within the company. This course is also a perfect complement to the company's ongoing process improvement initiatives (e.g. Six Sigma, Lean) and will result in a boost to those efforts. Participants will learn a set of management skills and will practice how to apply those in their own work place.
