Objective

This workshop is designed to give participants the knowledge and information they need to design and implement single-piece flow work cells.

Participants

The workshop is designed for up to 12 people.

Duration

The workshop is 2 full days for a total of 16 hours.

Pre-requisites

Participants should have completed a basic training course in Lean Manufacturing principles such as Lean 101 or equivalent.

Fee

Information on fees can be obtained by calling 918-280-9051, or visiting www.isiworld.net for contact information.

Course Content

Participants will learn about cell design, work balance, single piece flow, standard work, point of use storage, visual controls and performance measurement. Application of cell design techniques will take place in a shop floor environment.

Target Area

During the workshop the students will apply what they are learning to a particular product. They will gather data on the manufacturing process and then practice the steps of cell design for the product.
